27. Brief Description of Project (Send full project summary & application narrative in PDF)

Documentation of the rehabilitation and restoration of an 1883 King Iron Bridge Co. bowstring bridge that was swept off it's piers in August of 2010. We were ready to start the restoration process last spring, and have documented with photographs and video the process so far. Now we are set to put this bridge back together utilizing the skills of Spicer group of Saginaw, Michigan and BACH Steel of Holt, Michigan - both companies with years of experience working with historic iron bridges. With you help the documentation with photograph and hd video will continue until the process in complete, which will be when the bride is again reset on the original piers (which have no moved) over the N. SKunk River in Poweshiek County, Iowa. With full funding we expect the reset to happen in the Fall of 2011.
