27. Brief Description of Project (Send full project summary & application narrative in PDF)

The Chicago & North Western Railway Technical Drawing Project involves describing, cataloging data into our PastPerfect database, and filing away more than 20,000 technical drawings for facile retrieval. LSRHA has added another 3,000 drawings from the Copper Range Rail Road to the project. This project has been ongoing for the past nine months and is expected to be completed by the end of 2011. LSRHA is requesting \$1,000 to fund the services of a local website technician to upgrade the website to list all the cataloged collection items, make these items available for searching, and to provide the means to market reproductions as part of our effort to increase public awareness of our preservation efforts. This project began in June, 2010 and we anticipate the completion of the cataloging aspect of this project by the end of 2011.
