27. Brief Description of Project (Send full project summary & application narrative in PDF)					
<p>This project will ensure correct documentation of the Chadwell Gap Coal Company coke ovens and associated commissary site by enabling the Archeology Research Laboratory of the University of Tennessee to map and conduct limited shovel testing at the sites. Based on extensive research by the National Park Service, the Chadwell Gap Coal Company site has been determined eligible for the National Register of Historic Places. The coke ovens are in immediate danger of collapse and are threatened by possible looting of above ground historical debris, due to the site's proximity to a trail in the Cumberland Gap National Historical Park. The documentation of this site will allow the national park to commence emergency stabilization of the coke ovens and clean up of the site.</p>
