

TEXAS LENTICULAR TRUSSES OUTSIDE SAN ANTONIO. All were built in the 1890s by the Berlin Iron Bridge Co. *Above left:* Yancey Road Bridge over Hondo Creek, Frio County. This is one of the state's two lenticular through-trusses. *Above right:* County Road 133 Bridge at Dodds Creek, Coryell County, revealing the characteristic double-convex-lens profile created by the top and bottom chords. *Below left:* County Road 173 Bridge over Plum Creek, Caldwell County. *Below right:* End panel of County Road 230 Bridge over Plum Creek, Caldwell County. *Tex. St. Dept. of Hwys. & Trans. photographs.*
